Education

B.Sc. in Information and Communication Technology

2030 (expected)

Faculty of Information and Communication Technology

Mahidol University, Salaya, Thailand

- Dean's Scholarship, 2026. Faculty of Information and Communication Technology, Mahidol University. Awarded to 5 examinees per batch, renewable per semester with minimum GPA requirement.

Experience

Smart Pokajan! Table – Personal Project

August 2026 (ongoing)

- Designed a smart table for a replica of the minigame *Pokajan!* from *hololive Dreams*, using physical cards with NFC tags and card readers on dedicated stands.
- Built the user interface to target low-powered devices like the Raspberry Pi Zero 2 W, using raylib and the C language for cross-platform development and compatibility.

ThaiCPI – Personal Project

April 2025

- Created a webapp using Svelte to compare the value of the Thai Baht accounting for inflation.
- Utilized the Trade Policy Strategy Office's open data API to automatically obtain information for the current month, keeping it up to date.

MetroWise – Hackathon Project

November 2024

- Collaborated with 9 other students to build a prototype for a PWA to display crowdedness on the BTS SkyTrain system with Svelte.
- Implemented designs by the team into a functional prototype based on mock-up data.
- Received the "Best Idea Award" from the competition.
